Questions for Module 176: CS Impact on Society

1. **Positive Impact:** How has computer science positively impacted communication and productivity in society?

   Answer: Computer Science has positively impacted society by improving communication through faster response times (e.g., email, instant messaging) and increasing productivity by significantly reducing manual work.

2. **Negative Impact:** What negative consequences on society are mentioned due to the over-dependence on technology?

   Answer: Over-dependence on technology has led to decreased social interactions, with individuals attempting to connect online even with geographically close peers. This has adverse effects on societal engagement.

3. **Positive Impact:** How has CS contributed to exponential business growth?

   Answer: Computer Science has facilitated exponential business growth by streamlining operations, reducing manual work, and enhancing overall efficiency.

4. **Negative Impact:** What health-related issue is associated with the working habits influenced by CS?

   Answer: Prolonged sitting positions resulting from computer-based work have increased the likelihood of developing obesity among individuals.

Questions for Module 177: CS Impact on Health

1. **Positive Impact:** How has CS positively influenced the management of hospitals?

   Answer: Computer Science has positively impacted hospital management by enabling easy access to online health
